Q-DAS

Release Notes Desktop Application
Version: 14/240724 - 14.0.4.6

	Key	Changelog statement	Component/s
Bug	QDC-2275	If attributive characteristics (individual storage) had specification limits, the value chart was displayed incorrectly and the part evaluation (output points 10006 and 10008) was calculated incorrectly.	qs-STAT
Bug	QDC-2321	If all characteristics had a negative subgroup incidence, a special measurement could no longer be started and a general error occurred.	O-QIS, procella
Story	QDC-1211	in VDA5 analysis created with versions between 14.0.2 and 14.0.3.7, when opened with version 14.0.4.x, the individual values table of the measurement process was incorrect and repeated the first measurement as "Reference values".	solara
Story	QDC-2597	For an upload started with the parameter "-u=uploadname", the upload name is now also displayed in the task manager so that it is easier to identify them when using multiple uploads as a service.	M-QIS Upload
Story	QDC-2689	With a new option in the special measurements, the fixed subgroup size can now be transferred to the special measurement.	procella
