HEXAGON

Analysis Solution

Q-DAS Analysis Solution creates trust and transparency in industrial production. It delivers the prerequisites for monitoring real-world production processes in the best possible way
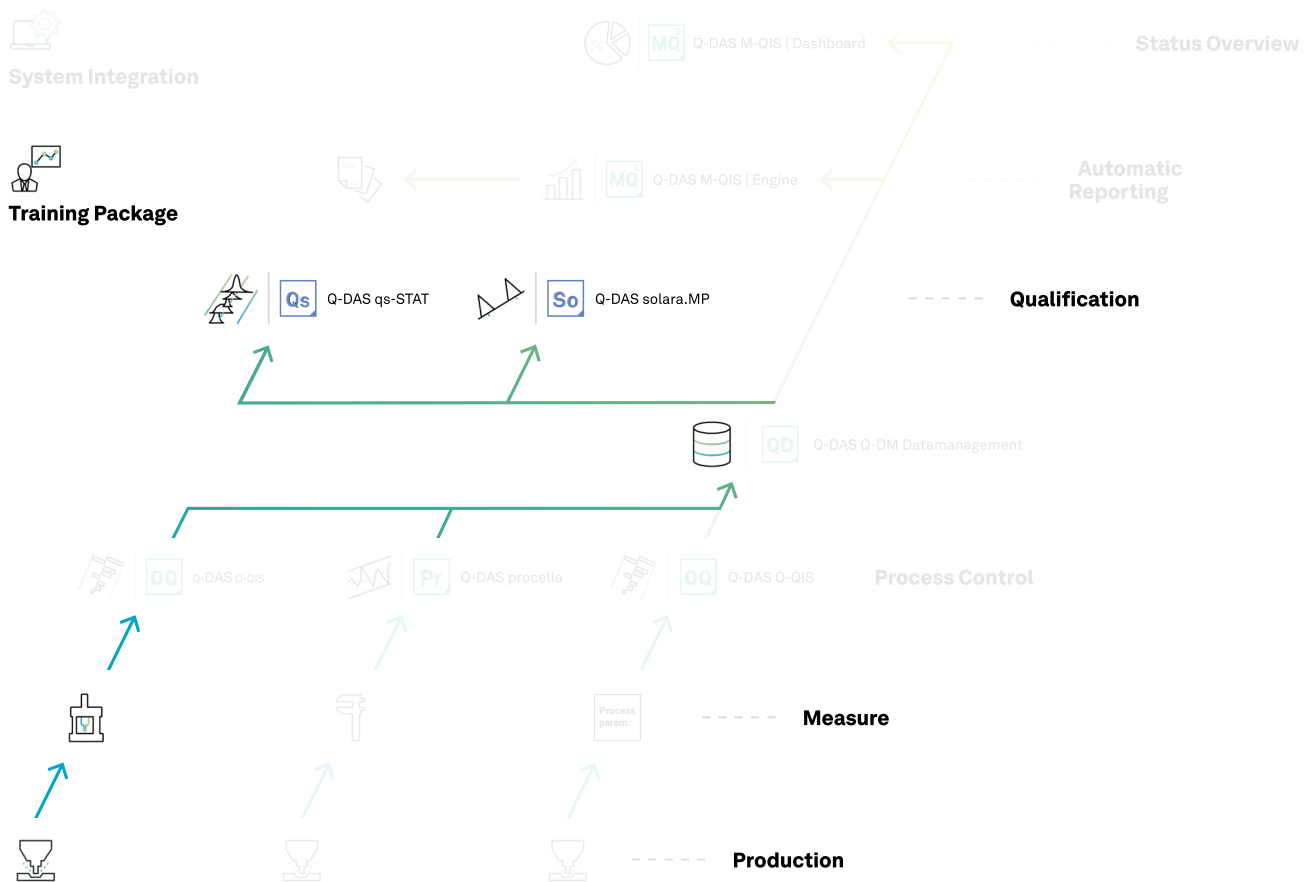

| Visit **hexagonmi.com**

In order to optimise processes during ongoing production, Q-DAS qs-STAT also analyses the capabilities. As a result, the users can safeguard the confidence of their customers since performance verification confirms that products are being delivered at the required level of quality.

Q-DAS Analysis Solution provides the basis for quality monitoring in industrial production. It contains the Q-DAS qs-STAT and Q-DAS solara.MP software products.

The goal of this solution is to provide documents that confirm that products have been manufactured at the required level of quality.

With Q-DAS Analysis Solution, users receive the results of test process investigations, machine acceptance and measurement system analyses in report form.

Q-DAS Analysis Solution includes introductory training for the Q-DAS qs-STAT and Q-DAS solara.MP products.

System Integration

Training Package

MQ Q-DAS M-QIS | Dashboard — — — Status Overview

MQ Q-DAS M-QIS | Engine — — — Automatic Reporting

Qs Q-DAS qs-STAT   So Q-DAS solara.MP — — — **Qualification**

QD Q-DAS Q-DM Datamanagement

OQ Q-DAS O-QIS   Pr Q-DAS procella   OQ Q-DAS O-QIS — — — Process Control
